

## Broken Reconfiguration Feasibility Study

Please join us at the upcoming  
community briefing sessions

Based on a recommendation from local water entitlement holders in 2022, the Broken Reconfiguration Feasibility Study (BRFS) has been established to consider changes that could be made to better meet the region's long-term needs. The study focuses on Broken River and Upper Broken Creek (upstream of Waggarandall Weir).

### SHARING THE WORK OF THE STUDY TEAM SO FAR

Please join us at the upcoming community briefing sessions where the BRFS team will be presenting the options and scenarios developed so far under the study. The team are keen to understand your perspective and any implications the draft options and scenarios may have for you.

### SESSION DETAILS
